## LABORATORY INVESTIGATION REPORT

Patient Name: Mr. Rahul Sharma

Patient ID: P-987654321

Age / Gender: 28 Years / Male

Date: May 13, 2026

Referred By: Dr. S. K. Verma (M.D.)

Sample Type: Blood (Serum)

### Complete Blood Count (CBC)

| Investigation            | Result   | Reference Range     | Unit       |
|--------------------------|----------|---------------------|------------|
| Haemoglobin (Hb)         | 14.5     | 13.0 - 17.0         | g/dL       |
| Total WBC Count          | 7,200    | 4,000 - 11,000      | cells/cumm |
| RBC Count                | 5.1      | 4.5 - 5.5           | mill/cumm  |
| Platelet Count           | 1,35,000 | 1,50,000 - 4,50,000 | cells/cumm |
| Packed Cell Volume (PCV) | 43.2     | 40.0 - 50.0         | %          |

### Blood Sugar Test

| Investigation       | Result | Reference Range | Unit  |
|---------------------|--------|-----------------|-------|
| Fasting Blood Sugar | 92     | 70 - 100        | mg/dL |
| Post-Prandial (PP)  | 125    | < 140           | mg/dL |

#### Pathologist's Remarks:

The haematological parameters are mostly within normal limits, except for a slightly low platelet count (Mild Thrombocytopenia). Blood sugar levels are stable. Clinically correlate with symptoms. Repeat test advised after 7 days if symptoms persist.
